Bulletin No. 26
July 26, 1993
AIDS - Alaska

Through June 30, 1993, 180 Alaskans have been confirmed to have AIDS. Of these, 100 are known to have died. Of the 180 AIDS cases, 162 are in males and 18 in females. Data below employ the new CDC case definition for AIDS. All cases are shown as diagnosed in the year the person first met the revised case definition. Note: data for 1993 are for first six months only.

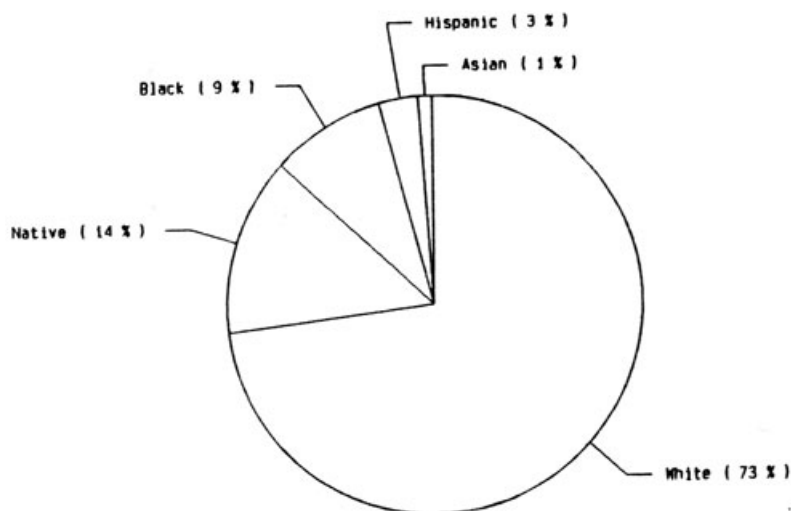

Risk Category,¹ N = 180

Area of Residence, N = 180

Residence	Number	Percent
Anchorage	122	68
Fairbanks	14	8
Juneau	10	6
