Population estimates as of July 1, 1996	37,640		22,767		96,871		305,028		71,376		74,118		607,800	

No cases of the following reportable diseases were reported during the above periods:

anthrax, cholera, plague, rabies (human), Reye syndrome, smallpox, and yellow fever.

Since only a portion of all reportable illnesses are reported, these figures represent trends rather than actual incidence. More complete reporting of cases to the Division of Public Health will result in more accurate statistics. The above figures represent both military and civilian reporting.

Correction: The "1996 (January-December) Infectious Disease Report" reported a single case of *typhus* in the Southwest region erroneously. This case should have been reported as *typhoid fever*.
