Population estimates as of July 1, 1998	38,483		23,649		98,647		313,308		73,028		74,285		621,400	

*Numbers for hepatitis C represent prevalent cases during each time period, not incidence of new disease.

**HIV infection became reportable in 1999.

No cases of the following reportable diseases were reported during the above periods:
anthrax, plague, rabies (human), Reye syndrome,
typhoid fever, typhus and yellow fever.

Since only a portion of all reportable illnesses is reported, these figures represent trends rather than actual incidence. More complete reporting of cases to the Division of Public Health will result in more accurate statistics. The above figures represent both military and civilian reporting.
