\*Numbers for hepatitis C represent prevalent cases during each time period, not incidence of new disease.

No cases of the following reportable diseases were reported during the above periods:

anthrax, plague, rabies (human), Reye syndrome, and yellow fever.

Since only a portion of all reportable illness is reported, these figures represent trends rather than actual incidence. More complete reporting of cases to the Division of Public Health will result in more accurate statistics. The above figures represent both military and civilian reporting.
