Population estimates as of July 1, 2004	39,659		23,813		99,290		347,646		74,405		70,622		655,435	

*Individuals reported to the Division of Public Health during this period for the first time with HIV or AIDS.

**Numbers for hepatitis C represent prevalent cases during each time period, not incidence of new disease.

No cases of the following reportable diseases were reported during the above periods:

anthrax, plague, rabies (human), Reye syndrome, and yellow fever.

Since only a portion of all reportable illness is reported, these figures represent trends rather than actual incidence. More complete reporting of cases to the Division of Public Health will result in more accurate statistics. The above figures represent both military and civilian reporting.
